EDUCATION

University of Pennsylvania, College of Arts & Sciences, Philadelphia, PA

May 2026

Bachelor of Arts in Computer Science and Urban Studies

Relevant Coursework: Intro to Transportation Planning; Big Data Analytics; Python; iOS Development; Urban Research Methods; Statistics; Data Structures and Algorithms; Applied Machine Learning; Databases and Information Systems

University College London, London, UK

December 2024

Semester Abroad at Bartlett School of Planning

Relevant Coursework: GIS for Social Scientists; Geographies of Infrastructure; Urban Economics; Cities and Social Change

RESEARCH & PROJECTS

Nobody Moves: Class-Based Inequalities and Rideshare Platforms in Bengaluru, India

May 2025– Present

- Selected for Hassenfeld Grant for Undergraduate Research in Urban Studies of \$3500 to travel to Bengaluru, India to conduct fieldwork research for senior thesis on the impact of rideshare platforms on social inequalities
- Conducted 50 semi-structured interviews with Uber and Ola drivers and passengers and coded transcripts with NVivo using grounded theory to surface themes across income, education, gender, caste, and education strata
- Presented findings to 30 members at Penn Urban Studies colloquium; paper published in Barnard-Columbia Urban Review

Optimizing Sustainable Transportation Policies with Agent-Based Modeling

August 2023– April 2025

- Developed an agent-based transportation model in NetLogo to evaluate Complete Streets policies in Philadelphia, simulating the impacts of road-space allocation on buses, private vehicles, cyclists, and pedestrians
- Analyzed simulation outputs across 40 datasets using Python and pandas to evaluate multimodal transportation performance and quantify return-on-investment metrics for street design interventions
- Communicated quantitative findings and transportation policy implications to 500+ attendees through presentations at Penn's Undergraduate Research Symposium and Penn Climate Week

New York City For-Hire-Vehicles Trips versus Public Transit

March – May 2025

- Analyzed 5M+ Uber and Lyft trips using Python and SQL to identify spatial and temporal patterns in ride-hailing demand across New York City
- Developed geospatial visualizations in Folium integrating trip origins, destinations, time-of-day patterns, and public transit routes to assess service overlap and identify gaps in transit accessibility
- Identified concentrations of airport-bound ride-hailing demand originating in high-income neighborhoods with existing transit connections, highlighting opportunities for further analysis of transit competitiveness and mode choice

London Disconnected: A Spatial Perspective on Internet Speed, Usage, and Deprivation

October – December 2024

- Used QGIS to analyze internet access, usage, and deprivation across London, finding that broadband speed aligned more strongly with income levels than actual usage

WORK EXPERIENCE

PricewaterhouseCoopers (PwC), *Technology Consulting Intern* | New York, NY

June– August 2025

- Contributed to SAP SuccessFactors HR Software implementation for major global media client, developing executive status update decks and action trackers to communicate progress and risks
- Presented updates to client leadership, translating complex system workflows into clear, actionable insights
- Utilized Microsoft Office tools such as Excel, PowerPoint, SharePoint, and Teams to track deliverables and coordinate across project teams

Siemens Energy, *Software Development Intern* | Orlando, Florida

June– August 2024

- Analyzed 15M+ records using SQL and Python to identify regional energy disparities and inform infrastructure planning
- Built GIS maps of 500,000+ households to visualize energy access gaps and presented findings to senior executives
- Communicated technical analyses through clear writing and data visualizations for non-technical stakeholders

SKILLS & INTERESTS

Skills: Java, Python, C, Swift, HTML, SQL, Machine Learning, AI, Microsoft Office Suite, GIS, Adobe Illustrator

Interests: Civic technology, Transportation equity, Data visualization, Global South urbanism
